Market Outlook: Indian markets likely to be on the flat on negative note taking mixed earning. Major bank results to be on cards to give some sort of direction to markets. Tracking the momentum, markets should hold above 8350 level which acts as a major support near 8350 and resistance is near 8480-8500 in near terms.

Global Market: US stocks fell on Thursday, continuing to pull back from the post-election rally, on investor caution ahead of Donald Trump's inauguration as president on Friday. The Dow fell for a fifth straight day, its longest losing streak since just before the November 8 US election. Still, Trump's swearing-in will mark one of the best performances for stocks for any presidential transition period of modern times. The S&P 500 is up 5.8 percent since the vote.
