Medium Term Pick:

Stocks	CMP	Support	Resistance	50 DMA	200 DMA	Bias	Preferred Trade
SAIL	142	113	153	129	86	Positive	Incorporated in the year 1973, SAIL has a market cap of Rs 58654 Crore and operates in Metals - Ferrous sector. The key positive catalyst in favor of the stock is the firms' higher operating leverage due to high conversion cost, the strength in China HRC export price, tight demand supply scenario in the domestic market, backward integrated with captive iron ore, permission from government to sell 25% of Iron ore production of previous fiscal and iron ore fines accumulated as waste over past 5-6 decades, and also demand from Railways which should keep its average NSR higher. Establish buy positions at CMP, and on dips between 125-127.50 zone, targeting 153 mark and then aggressive targets at psychological 175 mark. Stop 113. Holding period 2-3 months.

Theme: A metal stock with the mettle to outperform...

Buy STEEL AUTHORITY (SAIL) (CMP 141. Targets at 175):

Steel Authority of India Limited - A Maharatna · One of the largest steel producers in India and operates in Metals - Ferrous sector. SAIL is owned and operated by the Ministry of Steel, Government of India having an annual steel making capacity of about 21 million tonnes. The Government of India owns about 65% of SAIL's equity and retains voting control of the Company.

Incorporated in the year 1973, SAIL has a market cap of Rs 58261 Crore. SAIL produces iron and steel at five integrated plants and three steel plants, located principally in the eastern and central regions of India and situated close to domestic sources of raw materials. SAIL manufactures and sells a broad range of steel products

The key positive catalyst in favor of the stock is the firms' higher operating leverage due to high conversion cost, the strength in China HRC export price, tight demand supply scenario in the domestic market, backward integrated with captive iron ore, permission from government to sell 25% of Iron ore production of previous fiscal and iron ore fines accumulated as waste over past 5-6 decades, and also demand from Railways which should keep its average NSR higher.

SAIL is seen delivering across all front and strong margins in steel business are likely to drive momentum in stock price on the upside.

For the June 2021 quarter, SAIL returned to the black, posting a consolidated net profit of Rs 3,897.36 crore The company had posted a Rs 1,226.47-crore net loss in the year-ago quarter. Its net income during April-June 2021 more than doubled to Rs 20,754.73 crore, compared with Rs 9,346.21 crore in the year-ago period.

Robust operating performance seen aided by lower cost on backdrop of efficient working capital management coupled with sharp capital allocation is likely to improve prospects further.

Technically, brace yourselves for a breakout play on the weekly and daily time frames. The recent sequence of higher high/low is intact on all time-frames. An impulse uptrend is seen forming on the monthly time scale too, with positive SAR series.

Add to that a bullish divergence and a rising stochastic signal (on daily charts) with recent increase in volumes signaling a larger rebound. The 200 days Exponential Moving Average (EMA) of the stock on the daily chart is currently at 83 zone. The level of 83-87.50 zone will act as a strong support zone and any sharp panic declines to these levels offer opportunities to initiate aggressive long positions.

Establish buy positions at CMP, targeting 153/169 and then aggressive targets at psychological 200 mark. Stop 111.50. Holding period 3-5 months.

Daily Chart of SAIL:
