SBI is our preferred bet in the PSU banks on amidst is size and should benefit immensely from the pick-up in economic activity in the Indian economy, a favorable credit quality cycle, strong internal accruals, and excess liquidity with a sturdy PCR, healthy capitalization, a strong liability franchise, and an improved asset quality outlook.

Healthy business growth continues to be the key positive catalyst as the business of the bank has increased 13% YoY to Rs 7834968 crore end June 2023, driven by 14% surge in advances to Rs 3303731 crore. Deposits rose 12% to Rs 4531237 crore at end June 2023.

The other key positive catalysts:

SBI reported a 178% rise in net profit at Rs 16,884 crore in the June quarter aided by healthy net interest income and loan growth.

The net interest margin (NIM) came in at 3.33%, up from 3.02% in the year-ago period. The domestic IM of the lender grew by 24 basis points to 3.47% from 3.23 last year.

The biggest positive trigger in favor of SBI is no sharp deterioration in assets quality in Q1FY24. The fresh slippages of loans stood at Rs 7872 crore in Q1FY2024 (vs Rs. 3458 crore in Q4FY23) and Rs 10115 crore in in Q1FY2023.

Technically, brace yourselves with the sequence of a higher high/low formation on the monthly time frames. An impulse uptrend is seen forming on the daily time scale with positive SAR series.

Add to that a bullish divergence and a rising stochastic signal (on daily charts) with recent increase in volumes signaling a larger rebound. The 200 days Exponential Moving Average (EMA) of the stock on the daily chart is currently at 565 zone. The level of 565-567 zone will act as a strong support zone.

Look to accumulate at CMP, and on dips between 505-515 zone, targeting 603/630 and then aggressive targets at 701 with stop below 493. Holding Period: 9-12 months.
