Market Outlook

Indian markets are expected to open on a flat positive note on account of mixed global cues. Traders now keenly await direction from the US elections slated this week and clarity on the looming threat from the second wave of coronavirus cases across the US and Europe. Technically nifty index formed a small-bodied bearish candle which resembles a Doji kind of pattern on the daily charts. The Nifty struggled to sustain above the hurdle of the range breakout area at 11,750 levels. The formation of lower highs of a smaller swing on the daily chart could signal a possibility of further weakness below 11,600 levels again. On daily charts, the key support level for the Nifty is placed at 11,535, followed by 11,428. If the index moves up, the key resistance levels to watch out for are 11,749 and 11,855.
