

Table with columns: Stock, CMP, Support, Resistance, 21 DMA, 200 DMA, Intraday, Short Term, Long Term. Lists various stocks and their corresponding metrics.

All level indicated above are based on cash market prices.

Pivot Point

PP : Pivot Point : This is trigger point for weekly buy/sell based on the price range of the previous week.
R1 : Resistance one : 1st Resistance over PP. R2 : Resistance two : 2nd Resistance over R1.
S1 : Support one : 1st support after PP. S2 : Support two : 2nd support after S1.

As per the tool, the trader should take BUY position just above PP and keep the stop loss of PP and the first target would be R1. If R1 is crossed then R2 becomes the next target with the stop loss at R1.

Similarly if price goes below PP the trader should SELL and keep the PP as Stop loss and the first target would be S1.

If S1 is crossed then S2 becomes the next target with the stop loss at S1. This is a trading tool. The key to use of this tool is the use of STOP LOSS.
